OBJECTIVE

Fourth-year Computer Technology student seeking an internship opportunity to gain practical experience in software development, web development, and database management while applying and strengthening technical skills in a professional environment.

EDUCATION

Bachelor of Industrial Technology - Major in Computer Technology
Bulacan State University, Malolos, Bulacan *Expected Graduation: June 2027*

Relevant Coursework: Computer Programming, Database Management, Industrial Interface Design

SKILLS

- **Programming:** Familiar with C++, Java, Python, PHP, JavaScript, HTML, CSS
- **Web Development:** Laravel, Laravel blade, React.js, Node.js, Tailwind CSS
- **Development Tools:** Visual Studio Code, Git, GitHub, XAMPP, MySQL Workbench
- **Database:** MySQL and SQL
- **AI-Assisted Development:** Claude, ChatGPT, GitHub Copilot, Cursor, Prompt Engineering, AI-Assisted Debugging
- **Operating System:** Windows and MacOS
- **Languages:** Filipino, English and Basic Mandarin

ACADEMIC EXPERIENCE

Computer Technology Student
Bulacan State University, Malolos, Bulacan | 2023 - Present

- Developed academic projects involving programming, database management, web development, and system design.
- Applied programming concepts using Java, Python, C++, PHP, and JavaScript.
- Designed relational databases and implemented CRUD operations using MySQL.
- Created system flowcharts, database structures, user interfaces, and technical documentation.
- Worked collaboratively on software development projects and thesis activities.

PROJECT EXPERIENCE

MarketPay System – Digital Ticketing and Fee Collection System, *Thesis Project, Bulacan State University | 2026 – Present*

- Developed a digital ticketing and fee collection system designed for the Public Market of Malolos, Bulacan to improve the recording and monitoring of market fee transactions.
- Designed a system consisting of an **Administrator Web Portal, Collector Portal, and Vendor/Stall Owner Portal**.
- Implemented features for vendor and stall management, fee calculation, digital payment recording, ticket generation, collection monitoring, and centralized transaction records.
- Developed the system using **PHP, Laravel, MySQL, HTML, CSS, JavaScript, and Tailwind CSS**.

- Integrated the system with a **commercial Android POS device and thermal printer** for portable ticket printing and field collection.
- Designed QR/barcode-based vendor identification and transaction recording features.
- Developed an offline transaction workflow to allow collectors to record transactions when an internet connection is unavailable and synchronize data when connectivity is restored.
- Prepared system flowcharts, database designs, prototypes, technical documentation, and system testing materials

Campus Hub: School Resource Borrowing and Inventory Management System, *Academic Project*

- Designed a digital system concept for managing school resource borrowing, returns, and inventory tracking.
- Developed system workflows and user interface concepts to streamline resource management and improve accessibility.
- Applied programming, interface design, and system development principles in planning the proposed application.

Butchi Order Management, *Business Personal Project*

- Developed an order management system to record customer orders, track order status, and monitor sales for a small food business.
- Designed features for managing product listings, customer details, order history, and payment status in a centralized database.
- Built the system using **ReactJS, Typescript, Vite, Leaflet(Maps), TailwindCSS, and Nodejs**.
- Streamlined order-taking and daily sales tracking, reducing manual recording and errors.

CERTIFICATIONS & TRAINING

- **Introduction to SQL —**SoloLearn, March 2025
- **Introduction to HTML —** SoloLearn, October 2025
- **SQL Intermediate —** SoloLearn, May 2025
- **SQL Basic Course** — LearnSQL.com, October 2025
- **CIT OJT Orientation AY 2026–2027** — Bulacan State University, 2026
